

**RISK RATING**

- variable definitions - decide what to use: e.g. SRF; UK Plant Health Risk Register
- how to score? is weighting needed?
- likelihood x severity (impact) = risk rating.

**1-2 (LOW)**

- park and review (set date)
- handle risk through existing processes

**3 (MEDIUM)**

- monitor (attention / plan may still be needed)

**4-5 (HIGH)**

**ACTION PLAN**

- any score of 4 or 5 triggers action plan

**- T I M E S C A L E -**

Define { Decide response required: immediate, medium term, long term  
Period of impact: short, medium, long
