

National Tree Week

Be a Force For Nature by connecting, learning, caring and celebrating all the wonders of trees.

Learn about a tree

Trees are incredible! They come in all shapes and sizes. Research an incredible tree and find out more. You could even use your research to create a 'Tree-mendous Trees' factfile or display.

Connect with a tree

Connect with a tree in your school or your local area. Use all of your senses to feel the tree bark, Tree senses. Feel the tree, listen to the tree...

Care for a tree

If you are able to, plant a tree during National Tree Week! If not, [apply for free trees](#) to plant later in the year or [raise money to donate](#) to help plant, care for and protect trees at a local level.

Share a tree memory

Share your personal connections and memories of a tree.
What's your favourite tree? Why?
Share a special time where you saw a memorable tree (or maybe even climbed a tree!).

Poe-tree

Get creative and write some poe-tree. You could describe the tree, explain the importance and benefits of trees or even personify the tree! If you'd rather, write a story or a piece of non-fiction about a tree.

Read a tree

Choose a tree book to read (fiction or non-fiction). Even better, read the book together under a tree (don't forget to wrap up warm)!

Tree Art

Use natural materials (like fallen leaves) to make a piece of art, look carefully at the tree and sketch it in detail or even create a [Force For Nature Forest](#).

Be a Tree Detective

Look carefully at the trees in your school grounds. What changes have you seen in them over the last few weeks? What seasonal changes have you noticed?

ID a tree

Go for a walk and ID a tree. Look carefully at the bark, the branches and the leaves (which may be on the floor!). Why not make name labels for the trees in your school grounds so that everyone can learn what they are?
